SKADII MAINTENANCE OVERVIEW

The Skadii Maintenance Overview is a software application that allows you to efficiently **plan, manage and document** the maintenance work of your ropeways, vehicles, snowmakers and other objects across the entire ski resort using your PC or any mobile device.

In the Skadii Maintenance Overview, **maintenance plans from different manufacturers** can be integrated automatically and customized as required. Completed maintenance work and time spent on each procedure are clearly documented, and future maintenance assignments are presented simply and clearly. Staff is provided with **precise instructions** for their maintenance work, thus minimizing the risk of errors.

+ Save time
Provision and updating of maintenance plans from different manufacturers

+ Provide support
Precise instructions for the correct execution of individual maintenance steps

+ Streamline internal processes
1 intuitive tool for all users in the ski resort

+ Optimize information flow
Automatic synchronization between all devices
